Salt tablets for softeners

High-quality salt – tested in our own plants

EUROWATER salt tablets are produced under controlled production conditions and are tested in our own plants.

Pressed from pure vacuum salt

The salt tablets are pressed from pure vacuum-evaporated salt. Evaporation produces a uniform, high-quality salt without using unwanted binders.

Adds to reliability of operation

The high degree of purity of EUROWATER salt tablets minimizes the cleaning frequency and adds to the reliability of your softening plant.

High quality

EUROWATER vacuum-evaporated salt tablets fulfil the high quality requirements of EN973 type A on sodium chloride for ion exchange systems.

Our product is approved for food processing applications and contains minimum 99.8 % of sodium chloride.

Weight

Salt tablets are supplied in 25 kg (20 litres) plastic bags. A pallet contains 40 bags, each of 25 kg, totalling 1,000 kg.
